

With the release of GMN's P4+ precision, the grease coding has also been adjusted to better suit the needs of our customers. The below is a list of the most common greases utilized by our customers.

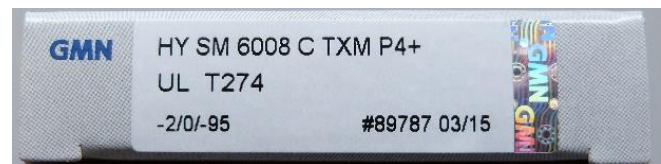

Please also note that if the grease percentage is not outlined on the bearing box, then the standard fill percentages apply.

Also note that other greases may be available for customer greasing at GMN Bearing USA Ltd.

This document will be updated periodically at www.gmnbt.com/downloads.htm

Standard Grease Fill	
S	30%
SM	30%
KH	25%
Radial	30%
